

# MUTUAL FUND PERFORMANCE RESULTS

...for each individual year since 1961

FundScope, the national monthly mutual fund magazine, takes a cold hard look at the performance records of 375 mutual funds and comes up with some eye opening data. Included in this tabulation are so-called Go-Go funds, No-Load funds and funds little known except to professional investors.

This dynamic March issue shows not only the results for each individual year since 1961, but the TOP 10% and BETTER-THAN-AVERAGE and BELOW-AVERAGE performers for each year. You'll probably be surprised to see that **ONLY 1 FUND WAS THE TOP FUND IN MORE THAN 1 YEAR...** And although no single fund was in the TOP 10% in all eight years, one fund was there in six of the eight years... one in five of the eight... two hit the TOP 10% in four of the eight and fourteen showed up in the TOP 10% in three of the eight years. **FUNDSCOPE NAMES ALL THESE FUNDS.**

While no one fund performed above-average in all eight years, four funds were above-average in seven of the eight years... seventeen in six of eight and thirty-one funds performed above-average in five of the eight years. **FUNDSCOPE NAMES ALL THESE FUNDS** as well as the below-average performers.

At a glance you'll see the CONSISTENT TOP 10% and "above-average" and "below-average" performers in both rising and declining market periods. See how your fund performed... compare it with other funds... with the Dow Jones Industrial Average and with the average of all funds and fund groups.

If you own any mutual funds, or are considering investing in funds, you owe it to yourself to read this exclusive issue. Not only does FundScope present exclusive performance data, but it outlines the basic premises which you must recognize if you are to become and remain a satisfied mutual fund investor.
